

**GAMBARAN KEBERSIHAN GIGI DAN MULUT MURID KELAS III
DAN PERAN ORANG TUA DI SDN PASINDANGAN 1
KABUPATEN CIREBON**

ABSTRAK

Islami A N¹, Anang², Robbihi H I³

Latar belakang : Kebersihan gigi dan mulut merupakan suatu pemeliharaan kebersihan struktur gigi dan mulut melalui sikat gigi, stimulasi jaringan, pemijatan gusi, dan prosedur lain yang berfungsi untuk mempertahankan gigi dan kesehatan mulut. Peran orang tua terhadap anak sekolah dasar sangat penting melihat anak sekolah dasar belum bisa menjaga kebersihan gigi dan mulutnya sendiri dan belum mempunyai pengetahuan yang cukup tentang kebersihan gigi dan mulut. **Tujuan** : Penelitian ini bertujuan untuk mengetahui gambaran kebersihan gigi dan mulut murid kelas III dan peran orang tua. **Metode** : Penelitian ini menggunakan metode deskriptif-survei dengan populasi 30 murid kelas III dan 30 orang tua murid kelas III. Teknik sampling menggunakan teknik total sampling dengan jumlah sampel 60 orang. Alat ukur penelitian OHI-S dan kuesioner. **Hasil** : Kebersihan gigi dan mulut murid kelas III diperoleh hasil terbanyak pada kriteria OHI-S buruk berjumlah 14 siswa (47%) dan rata-rata nilai kuesioner peran orang tua secara keseluruhan responden 54,44% dengan kriteria kurang berperan. **Kesimpulan** : Tingkat Kebersihan gigi dan mulut pada murid kelas III menunjukkan hasil yang buruk dilihat dari peran orang tua yang kurang berperan dalam menjaga kebersihan gigi dan mulut anaknya.

Kata Kunci : Kebersihan Gigi dan Mulut, Peran Orang Tua
